6. Vacuum Cleaner Problem

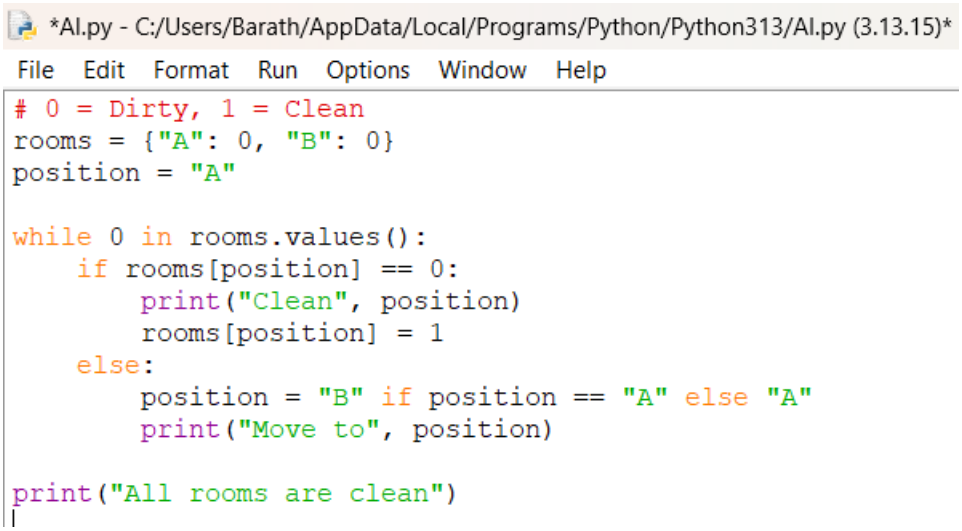

Aim

To simulate a vacuum cleaner that cleans two rooms when they are dirty.

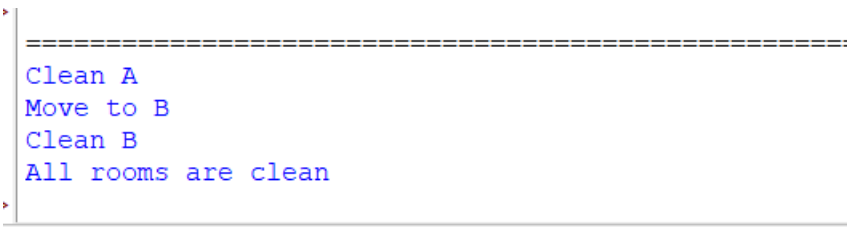

Algorithm

1. Represent rooms A and B as dirty (0) or clean (1).
2. Start the vacuum cleaner in room A.
3. While any room is dirty, clean the current room if needed.
4. If the current room is clean, move to the other room.
5. Stop when both rooms are clean and print the result.

Program

Output

Result

Thus, the vacuum cleaner cleaned both rooms successfully.
